

# INSTALLATION MANUAL

## LOCK AND ROLL TONNO COVER

### Parts included in the Assembly:

| Item | Description                             | Qty |
|------|---|-----|
| RA   | Tonno Tarp, with Front Bar and Rear Bar | 1   |
| RB   | Left side rail                          | 1   |
| RC   | Right side rail                         | 1   |
| RD   | Front Crossbow                          | 1   |
| RE   | Central Crossbow                        | 1   |
| RF   | Rear Crossbow                           | 1   |
| RG   | Clamp assembly                          | 6   |
| RH   | Adjustable Setting Knob                 | 2   |

**REQUIRED TOOLS:** 1 Allen Wrench 3/16", Measure Tape

### STEPS:

1. Check Contents of carton with the list above
2. Place the Right side rail (Item RC) and Left side rail (Item RB) on each side of truck bed.
3. Insert the clamps (Item RG) inside the side rail inner groves. Distribute evenly the clamps on each side of the cover (see picture). Tighten loosely the clamps with the Allen wrench

4. Insert Front Bar (item RA) into the 2 Side rails (item RB and RC), and tighten the Knobs (RH). (Pay attention to the position of the Knobs in the picture bellow)

5. Measure the length between the outside of 2 plastic Locking Tongues (The plastic locking tongue is on each side of Rear Bar), record the length.
6. Adjust the distance between 2 Side Rails on the truck bed, make sure the distance between the 2 Locking Bases is adjusted to same length as the result of Step 5. (The Locking Base is on the rear end of Side Rail)

7. Then tighten the Clamps tightly on the side rails with the Allen wrench.

8. Insert the cover crossbows (Item RD, RE, RF) in the groves of the side rails, as in the picture bellow. Position of the bows is defined by cut-outs in the rail

NOTE: Bows may have different lengths. In this case, put the longest one on the front, and shortest on on the rear.

9. Pull the Tonno Tarp, push down the Rear Bar, close and lock the Rear Bar
10. Insert the plastic extrusion on the Tonno Tarp into the outside groove of each Side Rail.
11. To open the cover, open the truck bed tailgate, pull the handle in the middle of the cover Rear Bar, unlock the bar, roll up the whole cover to the front of truck bed, then use the buckles to secure the rolled tarp.

#### WARNING-CARE OF THE COVER TARP

- a) Do not use cleaners for plastic or detergents. Clean the tarp with neutral soap and water
- b) When close the cover, make sure the Rear Bar is locked firmly, and side plastic extrusion is inserted into the Side Rail completely. Do not travel unless the cover is proper locked.
